Authentication

Admin endpoints require Authorization: Bearer <JWT>. Login accepts JSON { email, password } and returns a token and administrator summary.

Guest application fields

Submit multipart/form-data fields: name, email, phone, education, experience, skills, optional coverLetter and resume. Résumé must be PDF or DOCX and within configured size.

Error responses

400 validation/input error · 401 authentication required · 404 record/route not found · 409 duplicate application · 429 rate limit · 500 unexpected server error.
